DARSHAN P

Software Engineer | Full Stack Developer
Phone: +91 9380139409 | Email: darshandarshanp10@gmail.com | LinkedIn: linkedin.com/in/Darshan-prakasha
GitHub: github.com/Darshan-1045 | Location: Bengaluru, India

Professional Summary

Software Engineer and Full Stack Developer with hands-on experience in Python and JavaScript application development, REST APIs, database integration, debugging, testing, and software development fundamentals. Experienced in building applications using Python, FastAPI, PostgreSQL, SQLAlchemy, Node.js, Express.js, React.js, MongoDB, and RESTful services. Developed a Python-based Call Flow Analysis API for receiving structured JSON analysis and storing application data in PostgreSQL. Strong foundation in SDLC, Agile methodologies, Data Structures and Algorithms, Object-Oriented Programming, DBMS, and problem solving.

Technical Skills

- **Languages:** Python, JavaScript (ES6+), C, C++,Java Basics
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design, Component-Based Architecture
- **Backend:** Node.js, Express.js, REST APIs, RESTful API Design, MVC Architecture, Authentication, Authorization
- **Databases:** PostgreSQL, MongoDB, MongoDB Atlas, MySQL, DBMS, Database Schema Design, CRUD Operations
- **Full Stack:** MERN Stack, EJS, API Integration, Third-Party API Integration, Payment Integration, Cloudinary
- **CS Fundamentals:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, SDLC, Agile Methodology, Software Testing
- **Tools:** Git, GitHub, Postman, VS Code, Vercel, Render, Razorpay API

Internship Experience

Full Stack Development Intern – Pratinik Info Tech *2026 | 2 Months*

- Developed MERN e-commerce functionality by designing MongoDB schemas, implementing 10+ REST API endpoints using Node.js and Express.js, and building React.js interfaces for authentication, product search/filtering, cart, and order management across 30+ products.
- Implemented end-to-end payment processing by designing order and transaction schemas, integrating Razorpay and Cash on Delivery (COD) logic, and developing the React.js checkout interface, achieving 80–90% transaction success across 15+ test runs.
- Designed and developed a responsive admin dashboard for product, inventory, and order management using MongoDB, REST APIs, and React.js, reducing estimated manual admin update time by 80%.
- Integrated Cloudinary API for backend image storage and dynamic frontend rendering, and independently deployed and maintained frontend and backend services using Vercel and Render.
- **Deployed Applications:** User Portal | Admin Dashboard | Backend API

Projects

Airbnb Clone Web Application *Node.js, Express.js, MongoDB, EJS, JavaScript*

- Developed a full-stack property listing application using Node.js, Express.js, MongoDB, EJS, and JavaScript with MVC architecture, RESTful APIs, database schema design, CRUD operations, favorites, and responsive views.
- Implemented session-based authentication and authorization with CRUD functionality for property listings and deployed the application to Render with production MongoDB connectivity.
- **GitHub:** github.com/Darshan-1045/AIRBNB | **Live Demo:** airbnb-1f5g.onrender.com

Smart Task Manager *HTML, CSS, JavaScript, LocalStorage*

- Developed a task management application with priority categorization, overdue highlighting, filtering, and status-based organization using HTML, CSS, and JavaScript.
- Implemented JavaScript event handling and LocalStorage persistence to maintain tasks across browser sessions without a backend.
- **GitHub:** github.com/Darshan-1045/TaskManager | **Live Demo:** darshan-1045.github.io/Task$_{M}anager$

Real-Time Weather Crypto Dashboard *Python, FastAPI, PostgreSQL, SQLAlchemy, REST API*

- Built a responsive dashboard with live Bitcoin (USD) price tracking and user-searchable city weather data, refreshing both data streams every 5 seconds via Chart.js visualizations.
- Implemented client-side API handling and dynamic DOM updates to display weather conditions and cryptocurrency price data without requiring full-page reloads.
- **GitHub:** github.com/Darshan-1045/Dashboard | **Live Demo:** darshan-1045.github.io/Dashboard

Education

University Visvesvaraya College of Engineering (UVCE), Bengaluru **2022 – 2026**
B.Tech in Electronics and Communication Engineering **CGPA: 8.4/10**

Additional Information

- Solved 75+ Data Structures and Algorithms problems covering arrays, strings, linked lists, stacks, queues, trees, hashing, sliding window, sorting, and searching.
- Quant Masters and Campus Champ Internship Programs (2024) – analytical thinking and problem-solving training.
