DARSHAN P

Software Engineer | Backend Developer | Full Stack Developer

+91 9380139409 | darshandarshanp10@gmail.com | LinkedIn | GitHub | Bengaluru, India

Professional Summary

B.Tech Electronics and Communication Engineering graduate with hands-on full-stack development experience through a software internship and personal projects. Experienced in building web applications and REST APIs using JavaScript, React.js, Node.js, Express.js, Python, FastAPI, MongoDB, and SQL. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and DBMS, with experience in Git, API integration, and application deployment.

Technical Skills

- **Languages:** C, C++, Python, JavaScript (ES6+)
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Responsive Design
- **Backend & APIs:** Node.js, Express.js, FastAPI, REST APIs, API Integration, Authentication, Authorization
- **Databases:** MongoDB, PostgreSQL, MySQL, SQL, MongoDB Atlas, Database Schema Design, CRUD Operations
- **Tools & Deployment:** Git, GitHub, Docker Basics, Linux Basics, Vercel, Render, Cloud Deployment
- **CS Fundamentals:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Internship Experience

Full Stack Development Intern – Pratinik Info Tech *2026 | 2 Months*

- Developed MERN e-commerce features by designing MongoDB schemas, implementing 10+ REST API endpoints using Node.js and Express.js, and building React.js interfaces for authentication, product search and filtering, cart, and order management.
- Implemented checkout and payment workflows by designing order and transaction schemas, integrating Razorpay and Cash on Delivery (COD) logic, and developing the React.js checkout interface.
- Developed a responsive admin dashboard for product, inventory, and order management using React.js, MongoDB, and REST APIs.
- Integrated Cloudinary API for backend image storage and frontend image rendering, and deployed frontend and backend services using Vercel and Render.
- **Deployed:** User Portal | Admin Dashboard | Backend API

Projects

Airbnb Clone Web Application *Node.js, Express.js, MongoDB, EJS, JavaScript*

- Developed a full-stack property listing application using Node.js, Express.js, MongoDB, EJS, and JavaScript with MVC architecture, RESTful APIs, CRUD operations, database schema design, favorites, and responsive views.
- Implemented session-based authentication and authorization with CRUD functionality for property listings and deployed the application to Render with production MongoDB connectivity.
- **GitHub:** github.com/Darshan-1045/AIRBNB | **Live:** airbnb-1f5g.onrender.com

Real-Time Weather & Crypto Dashboard *Python, FastAPI, PostgreSQL, SQLAlchemy, REST API*

- Built a responsive dashboard for live Bitcoin (USD) price tracking and user-searchable city weather data with Chart.js visualizations and periodic data refresh.
- Implemented client-side API handling and dynamic updates to display weather and cryptocurrency data without full-page reloads.
- **GitHub:** github.com/Darshan-1045/Dashboard | **Live:** darshan-1045.github.io/Dashboard

Smart Task Manager *HTML, CSS, JavaScript, LocalStorage*

- Developed a task management application with priority categorization, overdue highlighting, filtering, and status-based organization using HTML, CSS, and JavaScript.
- Implemented JavaScript event handling and LocalStorage persistence to maintain tasks across browser sessions without a backend.
- **GitHub:** github.com/Darshan-1045/TaskManager | **Live:** darshan-1045.github.io/Task$_{M}anager$

Education

University Visvesvaraya College of Engineering (UVCE), Bengaluru **2022 – 2026**
B.Tech in Electronics and Communication Engineering **CGPA: 8.55/10**

Achievements

- Solved 75+ Data Structures and Algorithms problems covering arrays, strings, linked lists, stacks, queues, trees, hashing, sliding window, sorting, and searching.
